Heifers remained calm in the yards with their mother outside in a holding yard and moved through the assessment process well. As a mob of cows and calves they are moved regularly and have been through the yards as required. Being un-weaned they will require additional handling and education.

| Assessor Comments | On offer is an outstanding line of 77 one-mark Angus heifer weaners. Heifers are 8-9 months old and showing exceptional growth for their age. These weaners are Te Mania Blood, very fresh with plenty of shape. This is the entire drop of heifers from 165 cows presenting a great opportunity to purchase a genuine run of well-bred females that have not been picked through. All calves are still on their mothers and will be until delivery. Please note the vendor has the 88 steers offered in the same which are the brothers of these heifers. |
