Notable Traits

	Traits
8 Head	Old Ringworm patch
1 Head	White underbelly

Assessor Comments: A well-presented line of 98 paddock weaned AA heifers May/ June 2024 drop that have all the capability to grow out to any weight. This line of heifers present in fresh forward store to forward condition with the odd dry. They have been drafted, with the lighter tail taken out. There are two management tags due to 2 different properties but are under the same ownership. Temperament wise they are a quiet line of heifers to work with and handled quietly through the crush. Only 6 arced up slightly under pressure leading up the race. Some are still sporting their woolly coats, and a small handful are showing some signs of old ringworm around the head and neck area. All in all, a very neat and tidy line of weaned heifers. The same vendor has a line of 67 Black Angus steers in this sale as well.
