Steers flowed through yards well and are good cattle to handle both in yards and when mustering. A few cattle are quick to move away when put under pressure.

Handled With: Bikes , Dogs , On foot , Vehicles

Assessor Comments	36 unweaned June/July drop ‘Blackrock’ blood Angus steers with 1 steer showing some Shorthorn infusion. These steers have grown well for their age, with an average weight of 291.1 kg at the time of assessment, and are in prime condition, having been backlined with Moxilab in October. They also display good EMA (eye muscle area) measurements, highlighting their excellent muscle development. This is a great opportunity to purchase quality steers with excellent growth, muscle potential, and feeding prospects. Cattle will be weaned at delivery.
