Assessor Comments	Very well bred late winter drop lambs , that are out of composite ewes based on “Boonerah” bloodlines. These lambs are sired by the boonerah rams and also by high indexing white Suffolk rams that are both selected for high growth and muscle and fat characteristics. There is plenty of shape and bone in these lambs and they will make nice trade lambs or could be grown out to export weights. They are late July/August drop lambs that have come through a very tough spring and have grown out into their frames well. All the hard work has been done with these lambs very well grain trained and are freshly shorn, perfect feeder lambs to go straight onto feed and watch them bound away. 100 % of these lambs have been weighed at assessment between 26 and 34 kg at assessment. Please note vendor has another draft of these lambs in todays sale totalling 793 head.
