	Good line of Red crossbred steers to handle. Steers flowed well up into crush with only 3 becoming slightly stirry when put through the weigh box into crush to be then mouthed other then that comfortable to handle when majority have only came through yards once since landed. Photographing was good with a handle full walking off into a trot as displayed in video wrecking it for the majority which were good to photo and video. Would recommend to people with cattle experience					
	Bikes , Dogs , On foot					
Assessor Comments	A good line of crossbred trade steers to go forward into summer months with all the work done as steers are in forward condition coming off good country west of Tamworth. Steers originally purchased off coastal locations vendor has done a good job keeping dentition low to 0-2T and setting the average to 405kg. Steers would suit going back to the paddock for a short term trade into higher feedlot weights or turning into bullocks for kill job, as stated all hard work is done and creates a good trade opportunity for their next walk of life.
