The steers are well handled and easy to move without excessive bunching or anxiety in a relatively small yard. They block up well and require normal steadying through gates, the pound & race. The majority were very calm stepping off the scales with only a handful eager to exit quicker. Calm & inquisitive, free moving when walking through the yard for photos showing normal flight zone. The Mt Cornish cows are quiet & well handled.

Handled With	Bikes , On foot , Vehicles

Notable Traits

	Traits
8 Head	Fly rub marks
1 Head	Small warts around poll
6 Head	White underline, feet or markings

Assessor Comments	Good quality Santa & Santa cross backgrounding steers from a large frame herd of quality Santa & Santa x cows. The Mt Cornish herd are noted performing cattle having infused top quality Santa genetics over large frame quality Shorthorn cows over many years targeting the feeder and weaner market. With the frame they currently have they could easily weigh an additional 25/30kg. Again you will be purchasing frame to add compensatory weight to. Treated with Inverlab at assessment to subdue the current fly situation.
