JD Approved Vaccinates	Sheep are not JD Approved Vaccinates.			

Vendor Comments	These lambs would usually been fattened on summer crops or put through our feedlot, however due to the extremely dry conditions we have decided to let them go early.
Any Access To Rams or Stags?	To vendor's best knowledge, the female portion of this lot has had no access to rams or stags.
Assessor Comments	First Australian Farmland are offering 2450 lambs over 3 lines of 815. Sired by South Suffolk rams out of Composite ewes, they are an ideal article to tuck away & fatten for the winter markets. Health Treatments include; 2x 6in1, drenched with trifecta in January & Bovilis MH vaccination at weaning to help prevent pneumonia. They are currently running in containment yards being fed hay & supplemented with 700gr of barley per head daily. Lambs are Aug/Sept drop & would usually be kept on an fattened for trade an export orders. They come with my highest recommendation!!
Assessor	**Zac Van Wegen (Level 2 Accredited)**
