	Traits
1 Head	Stumpy tail, birth defect, refer photo, having no affects.

Assessor Comments: These scanned empty heifers would be ideal heifers to take onto crop or grain, and are in ideal condition to do so. When mouthing the heifers that came up as 2th all have solid milks beside them. These heifers didn't have a managed joining and were scanned empty by a contractor. Note the weight gain in these heifers, only been on fresh feed for a month, plenty of frame to put kilos on. $ per HD sale delivery on property, or delivered Barcaldine.
