Assessor Comments	18 Ultra Black cows joined up to the Booroomooka Angus sire. Being offered for genuine sale, vendor has downsized property and they need to lighten numbers. These cows had big calves weaned off them 15.10.22 and have not looked back. Vendor, who has preg tested his own cattle for many years, has armed these cows and they are 4-6 months in calf, again to the Angus sire. Vendor has been breeding Angus/Brangus/Ultra Black type cattle for many years with the cows being productive for a long time. These cows today are still on farm simply because they produce calves year in year out. They are best described as Ultra Black type. There are 4 brought in as heifers which were retained in herd would be more Brangus. 3 cows seen with white on udder. Good cows to go on with.
