Assessor Comments	A line of mostly very good quality purchased heifers. Heifers were pregnancy tested by a vet at assessment and all 56 are NDP, certificate available. 26% of the heifers are large framed with the remainder medium framed. They were purchased in January 2025 out of Euroa & Yea Saleyards, they are only for sale as the season has tightened even with recent rain. Please note three heifers with slight scarring in one eye, another heifer with active pink eye was treated with Alamycin at assessment. Buffalo fly was also present on the cattle at assessment, several heifers presented rub/bite marks around the eyes. Heifers are ideal to take directly onto feed or the top 63% would suit to join as future breeders, with the exception of tag #B48 that the vet commented has a small pelvic area. Same vendor also has a similar line of PTE heifers in this sale on a separate property that would make up a road train.
