Assessor Comments	A quality lot of Angus heifers PTIC to Hollywood Angus Bulls, which have been successfully used on heifers for several years. These heifers were purchased from CTLX store sales and similar feature sales almost 12 months ago. As you can see they've grown into big stretchy heifers showing all the right attributes of future breeders. These heifers have been joined for 8 weeks to commence calving on the 13th of February. Heifers are up to date with their health treatments and carrying good condition coming into calving . They've been handled regularly and the benefits can be seen in their temperament, they're extremely quiet and a pleasure to work with.
