	Some heifers were twitchy in the race and weigh box, and exited the headbail at pace, however settled well in the yard with their mates. One heifer was prone to pushing through the mob and watching where I was during photos.			
Handled With	On foot , Vehicles			
Assessor Comments	A mostly medium framed mob of forward store condition heifers, PTIC up to Wynella bulls and well on their way to producing a return for the successful buyer. The vendor has two lots of similar heifers with calves at foot for the same catalogue, of 28 and 32 head, and their calves are by the same bulls that this lot are joined to, and had no calving issues. There is one Broken Baldy heifer in the lot. The heifers are moved every day, and were taken away from the yards up a laneway made with a single hot wire, with other cattle in the paddock next to them, with no problem. Please be aware that it is 3 weeks since assessment, cattle will be inspected at delivery to assure no change to description.
