Assessor Comments	Good opportunity to acquire a well bred line of PTIC Angus females offered for genuine sale due current seasonal conditions. Cows represent a line of females which have all been joined to Hazledean bulls. They stand in strong store condition through to forward store condition in the lead end. They are generally larger framed females and all recently had calves weaned. Total of 91 cows offered in two groups. Cows are the product of a tough spring/summer though have carried themselves well through this time with a calf at foot. Plenty of upside to be had in these cows pre calve. Bundarbo progeny are well sought after amongst previous purchasers and these cows off an excellent opportunity to prospective purchasers. Please view video to appreciate the quality and upside of these females on offer. If required at delivery cows will be delivered in equal break up of age as best as possible.
