Notable Traits

	Traits
1 Head	White forward of Udder
5 Head	White on Udder

Assessor Comments Due to the current seasonal conditions we are experiencing in the southern parts of Australia, TRT Pastoral Group have decided to offload these PTIC Heifers which are scanned as "the last cycle" from their joining, hence the shortened 22-day period. These females were initially destined to be retained in the high indexing & performing TRT herd and therefore it is important to note that you are buying some of their best genetics of classed in females. Currently presenting in a forward/store condition which is ideal for maintaining a positive pregnancy & therefore also providing a huge upside for potential growth given the correct circumstances.
