Assessor Comments	The Landale's are offering 33 PTIC, 3 year old 2nd calving Angus cows. They are Dulverton & Bowen blood that were purchased off 'Okeview Pastoral' at Scone NSW as tops of the drop weaner heifers. These cows are joined to top Rennylea Angus bulls and were all foetal aged at original preg testing to calve in the first four weeks of the joining window, due TCC late July. Young females that have all reared calves last year and are only been offered due to such a tough season locally. Great young cows that have already proven themselves, with many productive years in front of them. Please note: Vendor is also offering 20 PTIC cows that all joined in the second four weeks of joining in the same sale. A great trade in opportunity with such a buoyant cow market.
