|                    | Cattle were a pleasure to handle through yards. Odd cow got excited in crush but settled back into mob very quickly and stood for photos well.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |      |                         |     |                                     |      |

| Assessor Comments  | An excellent run of PTIC Angus cows. 6-7 years. These cows were mostly bred by Clea Angus. Clea Angus is based on Rennyalea genetics with influences from industry leading AI sires. A portion of these cows are out of the Clea stud herd. Were due to be kept but vendors have decided to sell to make room for Spring calving cows. These cows are in the prime of their life and have all had calves before. Presenting in forward/prime condition, they would be a welcome addition to any Angus herd. Cows show plenty of bone and depth and will continue to be excellent matrons moving forward. Would also be an option to calve down and trade in strong markets on the back of the Spring/Summer rain. Please note: Vendor has 5 other lots of PTIC females in same sale. |      |                         |     |                                     |      |
