Assessor Comments	Excellent quality line of EU Accredited Angus steers that weighed 397kg full (333-437kg). These Talooby herd carries an outstanding reputation with some of the leading feedlots for high marbling and feedlot performance. Talooby have been using Rennyalea Angus genetics since the studs inception using only the very best genetics available. Please note; five steers observed with an old eye scar which have all recovered (worst eyes were removed), one with a patch of white backward of the navel, and a 10% tail end was removed from the line at assessment. These steers are ideal to add more value on grass to become heavy feeders/ grassfed steers, or to go onto feed now.
