Assessor Comments	These are a very good quality line of predominantly Droughtmaster cows and calves with over 50% preg tested back in calf to Ultrablack and Droughtmaster bulls. These are all young breeders with the majority being 4 years old. There are 9 smaller calves with the balance being of weaner age and size; as a whole the calves averaged over 200 kgs. Please note the photos to illustrate the quality of the cows and the quality and size of the calves. The vendor is flexible with the delivery period if the purchaser is affected by the predicted rain.
