Assessor Comments	An outstanding line of vendor bred PTIC Heifers, joined to a low birthweight Karoo bull for a predicted calving bracket of August/September. From the pick of the heifers when selected last year from the 2023 calf drop. Joined to Karoo R12 Enhance T294, which is an exceptional low birthweight heifer bull, nothing is spared on this genetic package. Some truly first class females which are showing the scope, scale and phenotype we all strive to breed. A line of heifers that would truly compliment any herd. An opportunity not to be missed. Buyers please note these heifers were preg-tested back in April, so are outside the auctions plus requirements for PTIC cattle.
