Assessor Comments
An excellent line of second calving cows to calve down in the Spring. These Te-mania blood cows have an excellent genetic background coming from the Ardenside Angus herd and have been joined back to Landfall Momentous S426 a bull who is top 5% of the breed for IMF at +5, Positive fats, big EMA at +9.1 and top 21% for both indexes. They were also backed up in January to Te-Mania T420 an excellent positive fat, easy calving bull with low birth weight and high IMF in the top 2% of the breed at +5.8. The cows present in store condition after coming through a very tight season. The cows calved unassisted last year and the vendor was very happy with the progeny. Only for sale as they need to reduce numbers. The cows show good type and temperament and would be an asset to any Angus breeding operation.
