The steers handled well given they have been off mum only a week. Quiet in the pound and very steady flowing up the race. None were noted as being aggressive and they remained calm when walking through them taking photos. Buyers of these cattle in the past have commented on the lovely temperament.

Assessor Comments A really good line of soft weaner steers with the majority showing some Simental influence either red or traditional, there are some droughtmaster steers and a few angus steers in the mob also. These steers will grow into terrific feeders or take through to bullocks. taken off their mother a week ago and put through the yards and race a few times, they are very good to handle through the yards. located in tick free area. It was noted that 1 steer had a small wart under his eye and there are 2 steers that were cut later than the rest of the mob. The sisters to these are listed in the same A+ sale.
