Assessor Comments	A good Quality line of Angus x Angus feeder steers to come off the very productive country of "Wongwibinda Station" in the Wongwibinda area. This line of Angus feeder steers have been purchased from the New England and the Hunter areas as weaners and were backgrounded to supply the feeder market. In perfect feeder condition these steers are primed for the feedlot as they offer very good compensatory weight gains as they are all frame as they have endured continuous wet and cold weather. Steers show plenty of stretch and bone with capacity and thickness to match to handle a short or long fed program. A neat 78 Head has been selected to maximize trucking, steers have averaged 431 kg full at assessment and have had a Coopers Bovilis MH + IBR pre feedlot vaccination. A great opportunity to secure a line of good quality angus feeders to suit all markets.
