Steers where good to handle, even though they where being worked on a hot day they stayed calm & rarely became temperamental. Approx 11% became slightly agitated in the crush area under close pressure. Good to handle in the yards (pound draft). Generally mob has a good temperament as they settled down quickly after pressure of handling & yarding up, catching & weighing. This mob handle well in yard & have received a significant education in the paddock & are handled exceptionally well.
