Assessor Comments	Buyers a nice line of PTIC Angus Cows. These cows were predominantly purchased from Timor Station as one line of first calf heifers. 5 head were purchased out of Inverell saleyards as Cows and Calves. These Cows have produced a good quality Calf every year and have now freshened up after Calves being weaned 2 months ago. Cows present a good opportunity to add to an existing herd or a starter mob. Cows have been running with Angus Bull continuously. Preg tested at time of assessment with 34 Cows being 5-8 months in Calf and 1 Cow being empty already having one Calf at foot. See photos for further satisfaction.Please note 2 Cows were noticed at assessment having old scarring in eyes although not detrimental. A sample of Cows were mouthed at assessment with 1 Cow missing one tooth. 2 Cows noticed at assessment with a hip off although doesn't affect them.
