Assessor Comments	A good group of 13 x PTIC 2023 Drop Angus Heifers. This group of heifers are set to commence calving in the first week of September. They were foetal aged at scanning and the majority of heifers were recognised to be 7-8 months in calf, a handful are 4-6 months in calf. The heifers are all Bonongo blood, the majority are vendor bred with some heifers purchased from the 'Bowden Family' at Adelong. A great opportunity to buy commercial quality PTIC heifers, they are in forward but not fat condition. The heifers are moderate framed and will provide buyers the opportunity to rejoin in 2026 or calve down and split for a trade opportunity. Please note the proximity to calving for intending purchasers.
