| Assessor Comments  | A line of Ultrablack x weaned steers with Palgrove Ultrablack bloodlines presenting in store condition. Strs were good to run through the crush at assessment with a percentage stirring but settling shortly after however 2 remained a little agitated. Strs are showing good frame for their weight and are just starting to clean up in their coat and really do. Strs did it hard through winter with it being so cold and wet and should present buyers with good compensatory weight gains.**Please Note** 2 steers had ringworm on their eye and face. Vendor has another lot in the sale. |                          |                             |
