Assessor Comments: A good to very good quality line of soft crossbred heifers. With medium to large frames the heifers suit to take directly onto feed for the domestic supermarket trade or grass and crop finish. They also suit to join with the top 55% very good potential future breeders. They had a LWR of 335 kg to 450 kg at assessment which was classed as a full weight eventhough they were mustered off oats at 5pm the evening before and then held in a good grass/clover paddock overnight. The vender bred heifers were bred on the family's property north of Dalby and non vender bred heifers purchased as calves at foot. They have been rotated through good quality improved pastures and now on oats for the last 12 weeks. They have not had access to any bulls and were vet preg tested at assessment as 100% NDP. Soft crossbred heifers that are moving ahead nicley and suit a range of markets. Please note trucking notice preferred to assist in smooth delivery.
