These heifers worked well through the yards whilst we drafted them before assessment with none of these heifers making anyone feel unsafe in the pound and always looked for a gate. During assessment some heifers got agitated in the headbale whilst being injected and mouthed but settled quickly when let out.

Assessor Comments: An excellent opportunity to secure a tidy line of 52 EU-accredited, vendor-bred Droughtmaster heifers, representing the breeder portion of the herd with only a small percentage retained. These quality females display depth of breeding and strong breed character, bred from proven bloodlines including Bellarine, Billabong, Strathfield, Dalmally, and Birch genetics. The heifers are well-grown, soft, and show good frame and femininity throughout. Quiet to handle and well-presented, they are genuine breeder-quality types that would suit inclusion in a replacement breeding program or alternatively could be grown out for heavy feeder or slaughter markets. Pretreated to assist with clearing to clean country. A standout opportunity to secure quality Droughtmaster females with the breeding, temperament, and presentation to perform in any operation. Please note different family brand (childrens) on 2 heifers.
