Handled well while on their mothers and once drafted off flowed through the yard calmly. In a big yard they are still fresh however with handling up to delivery they will settle much more, they are quiet calm cattle by breeding- no bad tempered cattle tolerated in breeder herd.

Handled With	Bikes , Dogs , Horses
Assessor Comments	Backgrounders these Steers need no introduction to the industry, they are bred by big boned, long, thick sires and out of a very functional large and medium framed cow herd, while being bred in Tordoned forest country. These steers are bred to perform by using great sires from Dangarfield Santa, horned Herefords from Sowden Farms and locally sourced Shorthorn sires. These yard weaned steers are EU Accredited and PCAS eligible, there's plenty of frame showing in these steers and they're sure to grow out to solid trade or export feeder or slaughter weights. Winter has been tough enough in this region & as such these steers do present lighter than normal, be sure they will grow. These weaners will be plunge dipped in a Tixafly dip prior to delivery. Reason being for dipping is as this property is first removed the vendor is simply being vigilant in case of an outbreak. This vendor also has 17 weaner heifers in same sale to make a neat deck load. I highly recommend this line of steers.
