1 Head	Late Marking (Not Detrimental)

Assessor Comments An Attractive run of 47 Charolais/Euro X steers. Steers have been running on a winter wheat crop and a pasture mix comprising primarily of lucerne and rye. Steers have really carried ahead over the last few weeks and are now losing their winter coats. These steers show good structure and frame and are in ideal condition to continue onto remaining crop to carry on and grow out as heavy feeders, or start on grain. Please note one steer was noted to have a signs of an old blue eye scarring and one steer was observed to have been later marked. Neither determined to be detrimental. Please refer to attached video and photos.
