Assessor Comments	A very good line of mixed-aged cows with calves at foot, presenting with plenty of potential and strong genetics. The cows are predominantly bred from Texas and Lawson Park bloodlines, with all calves sired by Lawson Park bulls. Calves are showing excellent growth and type, and the cows are displaying strong maternal traits, doing a very good job on their calves. These cows are of good frame and structure and would jump ahead given the right pasture or crop opportunity. All cows were mouthed on the day of assessment, with ages verified at that time. Approximately two cows show a very small influence of Shorthorn genetics, though overall herd consistency remains strong and uniform. This is a sound, functional line of breeders ready to go forward cows were very quiet and easy to handle through yards. 3 have old pink eye scaring in one eye not affecting their eye site. Some cows showing signs of rubbing.
