Assessor Comments	An excellent opportunity to purchase Vendor Bred Composite Ewes and enter the Fat Lamb market without a huge outlay. This line contains 65 x 4yo Orange Tags and 3 x 3yo Green Tags. This is the 1st Stage of the Dispersal of Fitzgerald Composite Ewes and these are the Autumn Lambing Ewes that have had their lambs weaned off on the 7/11/2022. This mob weaned 95 Lambs at 140%. They were shorn on 13/10/2022. In the past 5 years, Cloven Hills Rams have been used over a base of Chrome Maternal Composite Ewes with a focus on structure and fertility. All ewes are scanned after a 5 week joining and if they miss they are given one more joining and if they aren't in lamb again they are culled, therefore, all these ewes reared a lamb and most are still showing milk bags. 100% weighed at assessment with the range of 67-96kg and an average of 80.0kg. PLEASE NOTE THIS VENDOR HAS ANOTHER LOT OF 150 PURPLE TAG 2YO COMPOSITE EWES IN THIS SALE.
