Assessor Comments	An excellent opportunity to purchase Vendor Bred 2yo Composite Ewes that are proven breeders and with their whole productive life in front of them. This is the 1st Stage of the Dispersal of Fitzgerald Composite Ewes and these are the Autumn Lambing Ewes that have had their lambs weaned off on the 7/11/2022. This mob weaned 186 Lambs at 124% as Maidens. They were shorn over 2 days because of wet weather on 13/10/2022 and 25/10/2022. They are Cloven Hills Blood with Rams selected for structure and fertility. All ewes are scanned after a 5 week joining and if they miss they are given one more joining and if they aren't in lamb again they are culled, therefore, all these ewes reared a lamb and most are still showing milk bags. 100% weighed at assessment with the range of 53-89 and an average of 65.9kg. PLEASE NOTE THIS VENDOR HAS ANOTHER LOT OF 68 x 4YO COMPOSITE EWES IN THIS SALE.
