Assessor Comments	This is a high-quality line of predominantly crossbred steers that have been bunk trained on a diet of light silage and cottonseed ration. The steers are currently in a condition suitable for returning to the paddock on fresh feed. In July at weaning the steers were given a 400 day compudose HGP. The vendor is willing to provide a guarantee that the cattle will pass the dipping process if destined for clean country. The steers were sourced as cows and Calves earlier this year, with the stock purchased at the top end of the market at the time to ensure quality was prioritised. This represents a quality line of cattle that would be a valuable addition to any herd. They are very well educated and a pleasure to work with. If you have any questions, please do not hesitate to contact me.
