Assessor Comments	94 young future breeder ewe hoggets on offer. The ewes are showing good growth for age. The ewes were part of the lead draft of 500 that were production fed for 6-7 months and mated up to merino rams, and lambed down. Approximately half of the 94, had lambs, which were weaned off on 11 November, which is why some ewes have an udder in the photos. The ewes are classed annually by the stud breeder. The adult ewes flock average 19.0 micron in 2022. The Kuerschner's have been purchasing Leahcim rams since 2001. Growing a large frame, easy care, plain body merino ewe, cutting soft white stylish wool. Also have been removing ewes with excess breach wrinkle and have not mulesed since 2008. A good opportunity to get into some quality young ewes, with a good start in the jacket, that are ready to mate up. Top weight 79 kg, bottom weight 50 kg averaging 65.1 kg at assessment.
