| Assessor Comments | A good quality mob of high percentage Angus heifers that would be ideal replacement heifers or suit domestic or export feeder markets, showing above average quality and good potential for growth. Preg-tested empty by a vet the heifers are cycling and ready to join to a bull of your choice . Some heifers showed skin blemishes from ring worm however this should not impact their performance. The vendor is prepared to pre-treat these cattle after purchase by purchaser in tick free areas and present when necessary. |
