Assessor Comments	A line of Black Baldy and Red Angus heifers carrying strong Te Mania, Jarobee, Fernleigh & Kenny's Creek genetics. Heifers present in working condition after a tough season but still show plenty of frame and breeding quality. They have old pinkeye blemishes and a light touch of ringworm, both cosmetic only and not affecting performance. These are good, hardy heifers that will respond quickly to feed and have the genetic strength and structure to suit feeder heifer markets. Under normal seasonal conditions they would typically be sold as feeder-weight heifers.
