Assessor Comments	An exceptional line of Hazeldean blood Angus heifers account the breeder that are ptic to calve March for 6wks . These cattle perform in the tougher times very well and are very reliable to go back in calf . They will go on to grow into functional females to keep for years to come. These females grow to a very profitable mature age of 600-650kg and put everything into their calves .A fantastic opportunity. Please note that a small percentage of heifers have a white udder but are pure angus .
