Notable Traits

	Traits
3 Head	3 calves treated with Orbenin & Terramycin for pinkeye infection in one eye at assessment

Assessor Comments: A very good quality line of well bred, nicely grown out Angus heifers with their first calf at foot. These heifers are well developed, exhibiting very good frame for age & plenty of stretch. They are producing good milk, which is evident in the condition of marked & vaccinated calves at foot, which are 8-12 weeks of age & exhibiting excellent shape & softness, being sired by top quality CIRCLE 8 Angus bulls, combined with the carcass attributes of the Euro cross in a good percentage of the heifers. These heifers are showcasing all the characteristics & traits of being well bred, & are presenting in fresh condition. A great opportunity to secure a quality line of young, Angus & Angus cross breeders at the height of their production. With prime old cows currently selling well, they offer real value & an attractive change-over opportunity into younger breeders. Vendor is offering another 2 lines of young cow & calf units this sale also.
