Notable Traits

	Traits
3 Head	Angus heifers with slight white udders.

Assessor Comments A good line of predominantly Angus EU heifers. Heifers are 100% Grass-fed and no anti-biotics used EVER. Heifers presented in good forward condition, showing desirable frame and weight for age. There are 4 Black Baldy heifers, all of which are over 75% Angus. Heifers did have access to the neighbour's bull overnight in December, however they were treated with a PG afterwards (see assessment's previous details). Donnelly cattle have previously performed well in the feedlots, heifers should make a quality feeder heifer. Alternatively, join and get a quality calf down the track.
