There is small percentage that are flighty in the crush and race. In a large yard, they may have a tendency to run however are settled by the rest of the mob. As an assessor, I am aware these cattle have had minimal handling and believe, with further education/handling, they will settle down accordingly.

Handled With	Bikes
Assessor Comments	These heifers are out of a good framed Angus herd by Texas Angus bulls. They have been yard weaned for a month on straw hay and molasses. They are in ideal condition for anyone that is looking for a good quality, well weaned heifer to grow out for future breeders or finish on grass/grain. Three heifers with healing eye infections - treated at assessment and will be reassessed at delivery. One heifer with white markings on udder and white stripe on face.
