Assessor Comments	High quality line of Rennylea Angus blood, EU accredited, PTIC Angus cows to calve in the Autumn. These young females are from an outstanding Rennylea blood herd and are in calf to industry leading Rennylea sires P855 & Q837. The Skinners have been using AI through the herd for the past six years, and heifer select (genomics) the past couple of years to turbo charge genetic improvement. Combined with a hard-line approach to culling on visual, structural soundness & temperament, this herd is getting up there with some of the best. These young cows will continue to develop into large frame, deep bodied females that will be productive breeders for many years to come. The skinner progeny are always highly sought after from feedlots & backgrounders and are noted performing cattle. These cows would make a great addition to any herd or for someone looking for an entry into breeding. Please note; one cow in the line is a 'K' drop (2014), buyers have the option on this animal.
