Assessor Comments	An attractive offering of 2 year old heifers to calve in April to a son of Texas Iceman with a low birthweight EBV of +2.6 and calving ease of +2.9 (sire details attached / in photos). These are vendor bred heifers intended to be retained, and are only being sold due to a high PTIC rate in maiden heifers, so vendor is selling the late calvers. The heifers are out of large framed TeMania blood cows. A great addition to an existing herd or a small starter mob.
