Assessor Comments	An exceptional line of very quiet, young Angus Heifers. This is the top of the drop heifers from the Autumn calving. Heifers are from a tremendous herd of Karoo and Bannaby Blood Cows. The Lowe family have sourced the best of the Karoo Bulls for a number years and in the past 7 years, infused the right Bannaby Angus genetics along side the Karoo Sires. These heifers were weaned younger than usual due to seasonal conditions. Since weaning, heifers have done very well and will present in Store to Forward store. These females would make an ideal line to add to any herd or become the building blocks of a herd. At assessment, any heifer under 230 kg were removed from this mob.
