Quiet: 58 head Slightly Stirry: 2 head	Quiet: 52 head Slightly Stirry: 6 head Stirry: 2 head	Temperament not assessed in Paddock

Generally good to handle in and through the yards. Six heifers were moderately agitated in the crush and two were highly agitated. They would not fully settle and exited quickly. All settled quickly when back in the mob and were good to move and manage when taking photos and videos.

Assessor Comments A fair through to good and mostly very good quality line of Angus feeder weight heifers. With medium to large frame they suit to take directly onto feed or to grow out to export feeder weights. The top 30% also have the potential to make good quality future Angus breeders. They were purchased through 2025 and early 2026 for grass finishing in a grass fed program. Purchase date was recorded with approx 4 head purchased in May 2025, 33 in Sept - Nov 2025 and 23 head in Jan 2026. All heifers mouthed at assessment with four x 2 tooths, another four head just about to break 2 teeth and the balance solid milk tooths. Note another 2 decks of similar heifers from this vendor located approx 25km away. Good quality heifers which are still gaining weight and are primed to move ahead quickly on good feed.
