Assessor Comments	18 quality steers bred from large framed Angus cows. Averaging 308 kg at assessment these steers show good growth for age and plenty of constitution. They are backed with genetics with vendor purchasing the top sires annually at 'MYANGA' Angus bull sale, and this is proven through the shape and quality of these calves. They are also 'Fig Tree Park' blood with vendor purchasing cows PTIC off them last year. They were good to draft and run through the crush for weighing and will benefit from further handling in the yards. They were paddock weaned on the 11/4 and are doing well on native pasture. These calves will power ahead on crop or feed to large bullocks give the opportunity. Buy with confidence.
