Assessor Comments An excellent line of 100 x Sep/ Oct 2025 Drop Poll Hereford Heifers. Bred in the renowned Okeview program at Winderadeen, Collector. The heifers are sired by leading Poll Hereford bulls from Cascade, Bowen and Tycolah. This group of 100 x heifers includes calves that would normally be retained. Season alone dictates their sale. The heifers are yard weaned and have recently had their booster 5 in 1 and Cobalife B12. Well educated weaners, the heifers are bred from a very good herd of large framed, soft, fertile Poll Hereford matrons. These heifers would be suitable for breeding, feedlots or the trade. Generally considered to be the younger calves in the drop, they present in fresh condition having been weaned and are in excellent shape to take advantage of a backgrounding program. A tail was removed at assessment. Cattle with proven performance and many repeat buyers.
