Assessor Comments	Neat little line of EU Angus heifers weaners which are bred to perform and would compliment any breeding herd going forward. Only leading Angus AI sires from both Aust & USA have been used heavily in this herd through AI programs for the last 14yrs, then backed up to Angus bulls from some of our leading Angus studs, Te Mania, Rennylea, Dunoon and recently Landfall Angus. SUPER quiet, well weaned and handled, ready to take on to breed from or take to through to heavy feeders or kill weights. The temperament on these heifers is to be commended - Vendor does focus heavily on this trait. Vendor consistently sources leading genetics to take their herd forward ensuring their product is suitable for any area of the supply chain. Heifers weighed 245kg- 273kg at assessment. The odd wort on head and neck of a couple of heifers. Vendor has 17 EU Angus weaned steers - full brother's to these in this sale.
