Comment on Fat Score 1 Cattle	Ver little fat cover, cattle are in light condition. I would not suggest over crowding or trucking long distances without unloading and spelling. Cattle appear to be in good spirts with a tail of backwards types removed. However i would say that care needs to be taken.
Vendor Bred	Yes
Stock History	Out of bred and purchased cows with a genetic background from Waverly and Pine Creek. Bull genetic lines used in the herd from Hazeldean, Eagle Hawk & Bald Blair. Mostl likely some other studs also used.

Assessor Comments	Kia Ora Cattle Co presents a line of 156 Angus heifers to be offered as a split through the yards of 2 x 76. These cattle offer the opportunity to purchase a large run of one mark cattle to fit on 4 decks. These heifers have been through an extremely tight period as the weight suggests. They would certainly appreciate some warmer weather and improved feed. They have been weighed out from 100kg full and up. Quiet a few present with one or 2 eyes previous been affected by pink eye with scarring present. This is a great chance to purchase considering the weight a lower per head rate of stock that have compensatory gains. Some cattle present with ring worm. Vendor has a line of 75 steers as well in the same sale. Please take the time to view media and fully read assessment regarding trucking. Any questions please contact selling agent.
