Assessor Comments	Offering 8 decks of 144 young cows and calves. These cows range from 1 to 6 years of age and present in store to forward store condition, while doing an excellent job raising their calves. The cows were pregnancy tested by a veterinarian, with 53% PTIC and 47% NDP at the time of testing. However, as they are still running with Carabar Angus bulls, it would be expected that the PTIC percentage would increase with a later pregnancy test. All PTIC cows have been bang tailed. The calves comprise 60 steers and 84 heifers, and were sample weighed from 96kg to 229kg to average 159kg. A good opportunity exists for buyers looking to trade or build a breeding herd, with 53% of the offering presenting as 3-in-1 units. Vendor is also offering a run of the year older steers in the Yearling and Weaner sale, providing a good opportunity to view the future of the progeny.
